

Practitioner's Toolbox

HIPAA Resource Library (2003)

\$89 workshop price

If you need instruction in evaluating your practice and setting up privacy and security components for your practice then go to our **Toolbox** page.

If you already have a practical understanding of the regulations concerning protected health information but you need to generate the necessary forms then our **HIPAA Form Library** is what you need.

The **HIPAA Form Library** comes on a CD and contains not only the forms you need for registering and tracking the PHI of your clients but also policies that are required for your employee handbook. A *Decision Flow Sheet* is included that details every aspect of where forms should be used. The files are created in Microsoft Word and can be modified to show your practice name and other individualized information. By special request we will generate the files in other software formats. Please contact us for special ordering in that case.

Don't be caught off-guard by poor attention to control of your client's protected health information. Have the answers to privacy issues available when you need them.

Order Information

(fax or surface mail to address below. Orders can also be placed by Telephone)

Name: _____ Day Telephone: _____

Ship to: _____ City: _____
